Mani Meeting Guide

Step-by-step demo script for **ConnectOS** and **NestOS** — plus discovery questions and troubleshooting.

Jul 2026
45–60 min meeting
HummingBrains / RTS ops

Purpose: Walk Mani through both platforms, show what exists today vs roadmap, capture what he still needs.
You bring: Laptop · this PDF · internet optional for NestOS (works offline)

1. One-minute framing (say this first)

Product	Who it's for	What it solves today
ConnectOS	ConnectorsHR (website + admin)	Website enquiries in one inbox — candidates, employers, careers, contact — CV download + CSV export.
NestOS	HummingBrains / RTS staffing	Talent, Naukri sourcing, IaaS interviews, clients, revenue, activity logging, tasks, analytics.

Key line: ConnectOS = lead capture + admin for a marketing site. NestOS = full recruitment ops (demo). NestOS uses ConnectOS patterns for **verified activity**, **sign-out**, and **analytics**.

2. Before the meeting — checklist

ConnectOS (live stack)

```
# Terminal 1 — API
cd connectosWebsite1\server
npm install && npm run migrate && npm run seed:admin && npm run dev

# Terminal 2 — Website
cd connectosWebsite1\client
npm install && npm run dev
```

- Website: `http://localhost:5173`
- Admin: `http://localhost:5173/admin/login`
- Login: `server/.env` → ADMIN_EMAIL / ADMIN_PASSWORD
- Backup if DB down: public site + quotation HTML
- Production: connectorshr.com + /admin

NestOS (no build)

1. Open `NestOS\nestos-v2-demo.html` in Chrome/Edge (double-click)
2. Default role: **Recruiter — Arjun M.**
3. Sanity check (F12 console): `typeof state !== "undefined" && state.deliveryPhase`

3. ConnectOS demo (~15 min)

> *"Someone fills a form → hits our API → appears in ConnectOS admin with type, CV, source page — no lost WhatsApp/email leads."*

Step	Action	Talking point
1	Home, Job Hunter, For Employers, Contact	Every form posts to ConnectOS API
2	Submit test lead (Mani Demo)	Live proof of pipeline
3	Admin → filter, search, detail, CV, CSV	Sales/ops export to Excel or CRM
4	What it does NOT do	No pipeline, Resdex, tasks, IaaS → NestOS

4. NestOS demo (~25 min)

File: nestos-v2-demo.html · **Role switcher:** top-right dropdown

Part A — Recruiter (Arjun M.) ~12 min

#	Nav / action	What to say
1	Home	One screen for today — interviews, Naukri, tasks
2	Run today's interview	IaaS live capture · AI report ~2 min vs 45–60 min
3	Find on Naukri (Resdex)	Import CV in one click · no duplicate credit waste
4	Add to Candidates	Permanent firm asset in Talent Hub
5	All candidates	Profiles, resume, match to jobs
6	Log calls & outreach	Call / WhatsApp / Email / LinkedIn — log one live
7	Header **End day**	Extra unlogged work → notifies admin
8	Messages & tasks	Internal chat + assigned tasks
9	My analytics	Pipeline + outreach · verified only

Live demo Log call → Demo Candidate · REQ-88 · Interested → show **Verified**. End day → "2 WhatsApp follow-ups not logged" → submit.

Part B — Admin (Karthikeyan) ~10 min

#	Nav / action	What to say
1	Dashboard	Resdex imports, ATS sync, sign-out reviews
2	Sign-out reviews	Approve recruiter sign-out from Part A
3	Task command bar (bottom)	Assign without leaving screen
4	Workspace → Assign task	Pick person, due date, module
5	Analytics tabs	Pipeline · Sourcing · Outreach · Team · IaaS · Leads
6	Team & Tracking	Live status · utilization
7	Audit & Compliance	Idle vs active · verified activity
8	Clients + Revenue	CRM, renewals, MRR
9	Resdex + Settings	ATS connectors (Greenhouse, Workday)

Part C — Phases (if asked)

Phase	Modules	Demo
1	Talent Hub, Workspace, Activity, Analytics	Live
2	Clients, Leads, Revenue	Live
3	IaaS, Team & Tracking, Audit	Live
4	Resdex Sourcing, ATS sync	Live

5. ConnectOS vs NestOS

Capability	ConnectOS	NestOS
Website lead forms	✓	Leads (sales)
Admin inbox + CSV	✓	Workspace + audit
CV storage	✓	Talent Hub + Resdex
Call / outreach logging	✗	✓ **Activity log**
End-of-day sign-out	✗	✓
Task assignment	✗	✓ **Task bar**
Pipeline analytics	✗	✓
IaaS + AI reports	✗	✓
Naukri Resdex	✗	✓
Client CRM / MRR	✗	✓

6. Questions to ask Mani (take notes)

Operations

1. Where do recruiters spend most time?
2. How do you track who called whom?
3. Utilization — data or gut feel?
4. End of day if work wasn't logged?

RTS workflow

5. Staff aug vs TA vs IaaS — priority?
6. Resdex credit pain?
7. Which ATS do clients use?
8. Meet / Teams / Zoom for interviews?

People & overlap

9. Who assigns tasks?
10. Sales: revenue only or pipeline too?
11. EU team — same workflows?
12. Public website + lead inbox needed?
13. Website leads → auto client in NestOS?

Success

14. One thing in 4 weeks to impress?
15. What makes recruiters use it daily?

#	His answer	Priority H/M/L

7. What he might ask — be ready

Question	Response
Merge ConnectOS + NestOS?	Same patterns; one product = NestOS absorbs website forms + API. Scope talk.
Real Naukri integration?	Demo is workflow mock; production needs extension or API + legal.
Mobile app?	Responsive web first is faster.
Payroll / billing?	Revenue is intelligence, not accounting.
Cost / timeline?	Phased NestOS proposal + ConnectOS quotation.
Junior recruiter friendly?	Yes — start in Recruiter role; plain nav by design.
DPDP / security?	Audit + export in demo; production needs hosting + DPA.

8. Agenda (45 min)

Time	Block
0–5	Framing: ConnectOS vs NestOS
5–20	ConnectOS live demo
20–45	NestOS recruiter → admin
45–55	Discovery questions
55–60	Next steps

9. Troubleshooting

- **NestOS blank:** Ctrl+Shift+R · check F12 console · try another browser
- **Jump screen:** `state.view = "analytics"; render();`
- **ConnectOS empty admin:** start server :4000 · migrate · seed admin
- **CORS:** CORS_ORIGIN = http://localhost:5173 in server .env

```
node -e "const fs=require('fs');const h=fs.readFileSync('NestOS/nestos-v2-demo.html','utf8');new Function(h.match(/<script>
([\s\S]*)<\/script>/)[1]);console.log('OK')"
```

10. Cheat sheet

ConnectOS

Start: client + server npm run dev

Site: localhost:5173

Admin: /admin/login

Path: Job Hunter → submit → inbox → CSV

NestOS

Open: nestos-v2-demo.html

Recruiter: Home → Resdex → Log call → End day

Admin: Sign-out → Tasks → Analytics → Audit

Roles: top-right dropdown

11. Follow-up email (template)

```
Hi Mani,

Thanks for your time today.

ConnectOS — website enquiries → secure admin inbox (types, CVs, CSV).
NestOS — talent, IaaS, Resdex, activity logging, tasks, analytics.

You mentioned: [top 2–3 needs].

Proposed next step: [priority item].

Happy to send a short proposal once you confirm priority.

— [Your name]
```
